PROFILE

Final-year B.Tech Computer Science and Engineering student at RGUKT Ongole with a CGPA of 8.88 and hands-on experience in Python programming, application development, AI-powered automation, and API integration. Developed projects using Python, Streamlit, LangChain, and SQL, with experience in debugging, testing, and building practical software solutions. Strong problem-solving and analytical skills, with a willingness to learn new technologies and collaborate on technical projects.

EDUCATION

B.Tech in Computer Science Engineering 08/2023 – 05/2027
Rajiv Gandhi University of Knowledge Technologies Ongole
CGPA: 8.88

BS in Data Science & Applications Ongoing
Indian Institute of Technology, Madras (IITM)

SKILLS

Programming Languages: Python, SQL
Technical Tools: Git, GitHub, VS Code, Streamlit
Software Development: Basic Application Development, API Integration, Debugging and Troubleshooting
Computer Science Fundamentals: Object-Oriented Programming (OOP), DBMS, Problem-Solving
Analytical Skills: Analytical Thinking, Technical Issue Identification, Solution Development
Professional Skills: Communication, Team Collaboration, Time Management, Adaptability, Willingness to Learn New Technologies

INTERNSHIP EXPERIENCE

AI Intern – Sales Call Assistant 08/2025 – 10/2025
Infosys Springboard
- Attained 89.7% transcription accuracy using Groq Whisper-large-v3 for real-time sales call speech recognition.
- Connected Google Sheets CRM data to retrieve customer profiles and automate call-data logging.
- Enabled 4 core capabilities: sentiment analysis, personalized product recommendations, objection handling, and automated post-call summaries through Streamlit.

AI Data Annotation Intern 06/2026 – 07/2026
Student Tribe (In Association with Tao Digital) Hyderabad
- Validated video datasets frame by frame, checking 6 attributes: head, face, torso, occlusion, yaw, and pitch.
- Identified and corrected video annotation inconsistencies by following labeling guidelines and reviewing attribute values to maintain dataset quality.
- Prepared quality-checked video data for machine learning model training and evaluation.

PROJECTS

TechNova Production-Ready AI Customer Support Chatbot | Python, LangChain, LangGraph, NVIDIA NIM, LangSmith
- Built a LangGraph-based chatbot using NVIDIA NIM and tool calling for 4 workflows: order status, returns, warranty, and shipping.
- Achieved 100% correctness on a 10-question test set while monitoring latency, token usage, failures, and user feedback.
- Implemented fallback and retry mechanisms, reducing input tokens by 78.81% through conversation history optimization; deployed on Streamlit Community Cloud.

AI-Powered Order-to-Cash Multi-Agent System | Python | Groq API | LLM | Multi-Agent AI | Streamlit
- Orchestrated 4 specialized agents for order validation, inventory verification, payment-risk assessment, and AI reasoning.
- Designed a 5-stage workflow for order validation, inventory checks, invoice generation, risk assessment, and AI-generated explanations.
- Created a Streamlit interface to process 3 sample orders, generate invoices, and display risk levels and agent outputs.

Email-to-Action AI Agent | Python | Groq API | LLM | Streamlit
- Built an LLM-powered email processing system to classify messages into 5 intent categories: Invoice Submission, Payment Query, Dispute, Spam, and Ambiguous.
- Configured 5 automated actions for invoice logging, draft replies, follow-up tasks, spam marking, and human review, using a 70% confidence threshold to flag uncertain classifications.
- Developed an interactive Streamlit interface and JSON-based audit logging to record email classifications, confidence scores, reasons, and actions for traceability.

Spam & Ham SMS Classifier | Python | NLP | Scikit-learn | Streamlit
- Processed 5,572 SMS records, removed duplicates to retain 5,157 messages, and performed text preprocessing for spam detection.
- Extracted 5,000 TF-IDF features and evaluated 3 machine learning models: Naive Bayes, Logistic Regression, and Linear SVM.
- Recorded 97.48% accuracy, 84.38% recall, and 89.26% F1-score with Linear SVM on a 1,032-message test set.
